Summary

A Computer Science student with hands-on full stack developer experience and experience of mobile application development using React Native and knowledge of AI-based solutions. Built and deployed many projects and demonstrated strong problem solving capabilities in competing at the IIT (BHU) and CGC University hackathons as a finalist. Founded CampusXcelerate and have been leading technical initiatives and collaborating in teams. Looking for a role as a Software Engineer, Full Stack Developer, or React Native Developer to help create scalable and high-performance applications.

Skills

Programming Languages C, C++, JavaScript, Python	Mobile Development React Native
Frontend HTML5, CSS3, Javascript, React.js	Backend & Databases Node.js, Express.js, FastAPI, MySQL, Firebase
AI & LLM LangChain, LangGraph, Generative AI, Agentic AI, MCP server	Tools & Technologies Git, GitHub, Postman, Figma, Docker, Kubernetes, Redux

Professional Experience

Reactnative intern, Apptechies • Developed a robust cross platform food ordering app , following modular architecture; designed responsive user interface components; designed and created REST API -integrated end-to-end ordering workflow including cart-ordering-checkout-tracking systems. • Utilized advanced knowledge of Redux Toolkit, AsyncStorage , and React Navigation to maximize application scalability, effectively manage state, and enhance performance and user experience.	07/2025 – 09/2025 Mohali,India
Web Development trainee, Solitaire Infosystems Private Limited • Built an imitation of a responsive website for Nike, using the latest technologies such as HTML5, CSS3 and JavaScript to create modern layouts and user interfaces that allow users to interact with the site. • Used Flexbox, CSS Grid, DOM manipulation, and responsive web design principles to create reusable components and help improve the overall user experience.	06/2024 – 07/2024 Mohali,India

Projects

Predictive Parking Marketplace • Developed a smart parking marketplace that uses AI. Leveraged React Native and JavaScript as well as Firebase to build a predictive parking experience with trust scores and seamless Ambient Mode . • Implemented Augmented Reality navigation, real-time parking verification , smart booking capabilities, EV charging, safety mode , and a community based smart parking marketplace.	09/2025 – Present
---	-------------------

Food Order Delievery App - Engineered a Food Ordering App using React Native with features such as dynamic product browsing, cart management, and REST API integration for a seamless ordering experience. - Used Redux Toolkit for application state management, AsyncStorage as Persistent storage of user sessions, and React Navigation to allow users to track their orders seamlessly.	07/2025 – 09/2025
Food Order Delievery Website - Developed a continually evolving restaurant website incorporating HTML5 and CSS3 as well as representing the restaurant's categories, specialties of the chef, easy online reservations, and promotional specials. - Utilized Flexbox and CSS Grid to build a multi-section interface for the multi-section user interface where users can see menu highlights, view/print menus, and enjoy an intuitive browsing experience.	02/2025 – 05/2025

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering, <i>Seth Jai Prakash Mukand Lal Institute of Engineering & Technology</i>	08/2023 – Present Radaur
---	-----------------------------

Leadership

Founder, CampusXcelerate Founded and led a student-led technical community , organizing workshops, hackathons, and networking events to promote technical learning and collaboration, while also collaborating with other communities to expand reach and engagement .	07/2025 – Present Remote
Community Manager, Elite Coders Managed community engagement and coordinated technical initiatives to enhance collaboration and knowledge sharing ; administered and optimized social media platforms including LinkedIn, WhatsApp , and Discord to increase member participation and community growth.	04/2026 – Present Yamunanagar, India
Campus Mantri, GeeksforGeeks Represented GeeksforGeeks as Campus Mantri by organizing coding workshops, hackathons, and technical events, driving student engagement, promoting competitive programming, and building a collaborative developer community within the campus.	12/2024 – Present Noida,India

Achievements

- Finalist at **HaXplore Hackathon** organized by **IIT (BHU)** for developing an innovative technology solution.
- Finalist at **Escape Da Vinci Hackathon** organized by **CGC University**, being in the top 100 teams out of 1000+ teams with a real-world software solution.
- Selected for the **Internal Round of Smart India Hackathon (SIH) 2025**, presenting an AI-driven solution.
- Selected as a contributor in multiple open-source programs including **NSOC, GSSOC, SSOC, and ECSOC**, actively contributing to real-world projects.

Certifications

- Career Essentials in Generative AI** – Microsoft & LinkedIn Learning
- GitHub Mastery: From Beginner to Advanced** – GeeksforGeeks
- Career Essentials in GitHub Professional Certificate** - Github
- Google Cloud Career Launchpad** – Google Cloud
